

CBRE ServiceInsight
ANALYTICS

Reporting and analytics for insightful decision-making.

Maintenance management solutions generate a wealth of valuable data on employee experience and asset performance. However, just as important as the data itself is having the right platform to assemble, visualize and translate that data into insights, and, ultimately, smarter business decisions. Build a better business with real-time access to performance drivers delivered to you by CBRE ServiceInsight Analytics.

Optimize your workplace performance

ServiceInsight Analytics is a standard suite of dashboards, metrics, and in-depth reports on your most impactful facility performance metrics. Our solution enables you to optimize performance by analyzing drivers such as cost, service level, proactive maintenance, employee feedback, and more.

In addition to offering standard maintenance analytics, our unique solution allows for customization of dashboard and reports as well as source data. Looking to visualize financial data from your financial system? Or perhaps IoT (Internet of Things) data from equipment sensors? Look no further.

CBRE STANDARDS

ServiceInsight Analytics leverages the facility management expertise of CBRE, the world’s largest commercial real estate services provider. We have developed this suite of standard dashboard and reporting tools based on the metrics that help us deliver market-leading asset performance and employee experiences for our clients. ServiceInsight Analytics packages the analytics that help optimize performance.

BENCHMARK PERFORMANCE

ServiceInsight Analytics enables you to benchmark the performance of your facilities. Use internal benchmarking or external industry data to compare your locations to the highest performers, based on a variety of impactful metrics.

DATA MODEL

Recognizing that many analytic solutions have fallen short by only displaying high-level information, ServiceInsight Analytics gives you the ability to drill-

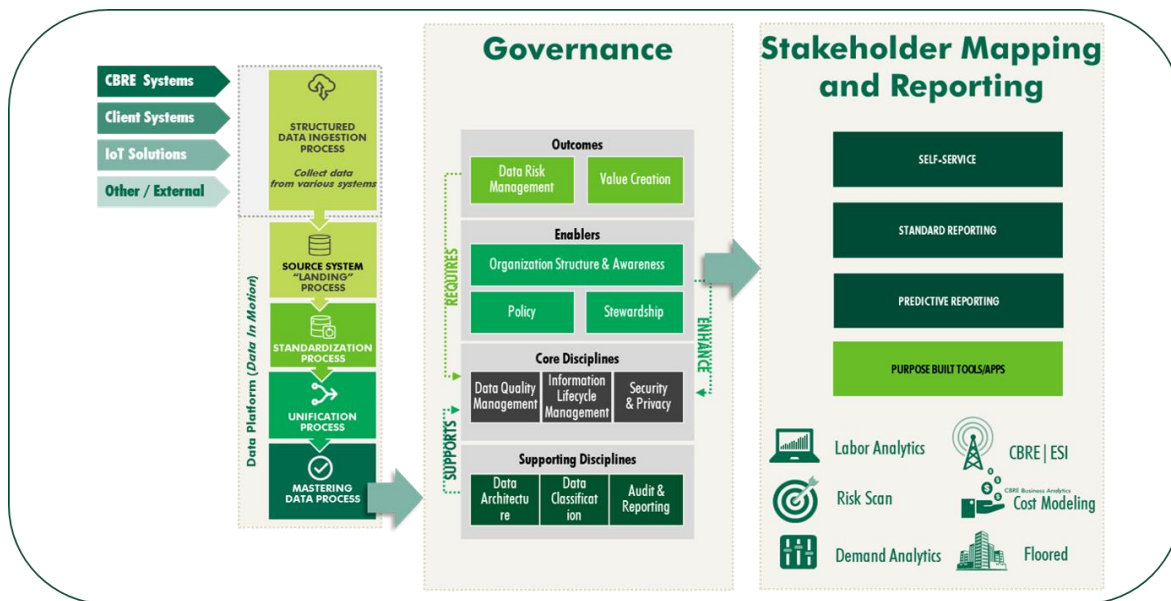

down into detailed performance drivers. Our data model is unparalleled, allowing users to connect key metrics at various aggregate levels to the maintenance details that are impacting performance. ServiceInsight Analytics offers a comprehensive platform for optimizing your operations.

PERSONALIZED INSIGHT

Looking to go further than the standard dashboards and reports offered by ServiceInsight Analytics? Our platform is customizable. Whether its additional data sources or a personalized interface displaying the information that matters most, our analytics team can make it happen!

CBRE VANTAGE ANALYTICS

CBRE Vantage Analytics is a comprehensive solution that leverages data across our full suite of CBRE technologies. If you are looking for a broader analytics view across all your real estate systems, CBRE Vantage can help!

Optimize Your Workplace

ServiceInsight provides the right tools for each role to maximize performance at your facilities. Optimize asset performance and employee experience for your facilities with ServiceInsight.
